

Two unique NEW Solutions from ASG Services

New to our range of solutions for the frozen and chilled foods industry include the unique **Silverback PO+** cold store labelling system and our **UV instant cure line marking system**.

Silverback PO+ Cold Store Labelling

Silverback PO+ is the answer to the perennial problem of labels which don't stick at low temperatures. Printed onto a blended polyolefin material - a blend of Polyethylene (PE) and Polypropylene (PP). The labels are specially coated to ensure maximum quality laser print verification.

- ✔ Can be applied at temperatures down to -30°C and remains effective down to -50°C
- ✔ No show through - consistent scan guaranteed
- ✔ Easy backing removal - allows for quicker installation
- ✔ More durable to minor impacts
- ✔ Thicker 100mic material allows for easier installation
- ✔ Proprietary silver coated reverse that is 100% opaque, allowing re-labelling over existing - a major time and cost saver

UV Instant Cure Line Marking

- ✔ Solvent free - Zero VOC emissions
- ✔ Can be applied in temperatures as low as 26°C
- ✔ Instant drying - ready for use within a few hours
- ✔ First eco-friendly line-marking solution to the market
- ✔ Completely odour free
